

Emerging Investment Opportunities in Primary Upstream Petrochemical Projects

Saudi Arabian International Gas Conference

May 17, 2004

أرامكو السعودية
Saudi Aramco

Beginnings of the Petrochemical Industry

1. Feedstocks from Master Gas System (MGS)

- Gather & process associated gas
- Provided methane, ethane & NGL feeds

2. Government policies to attract investment

- Royal Commission for Jubail & Yanbu
- Incentives to “jump start” the industry

3. Established Saudi Basic Industries Corporation (SABIC) to build/operate industrial facilities

- Government and private funding
- Independent and joint ventures

Saudi Arabia's Petrochemical Growth History

- **Exponential growth fostered by advantaged feedstock**
 - ◆ 25 Chemical plants in '70s, US \$0.5 Billion
 - ◆ 300 plants in 2000, about US \$20 Billion investment
 - ◆ Forecast more than 500 in 2005
- **Requirements for expanded feedstock**
 - ◆ Associated gas inadequate to meet needs
 - ◆ Saudi Aramco developed non-associated gas to supplement
- **More than 50 Petrochemical Products:**
 - ◆ Approximately \$10 Billion in annual sales
 - ◆ Sold in nearly 100 countries

Saudi Primary Petrochemicals % of World Supply

- 18 Petrochemical Complexes
- 15 International joint ventures
- 14,000 Employees
- About 60% of Saudi non-crude export revenues

Saudi Arabia's Feedstock Supply Sources

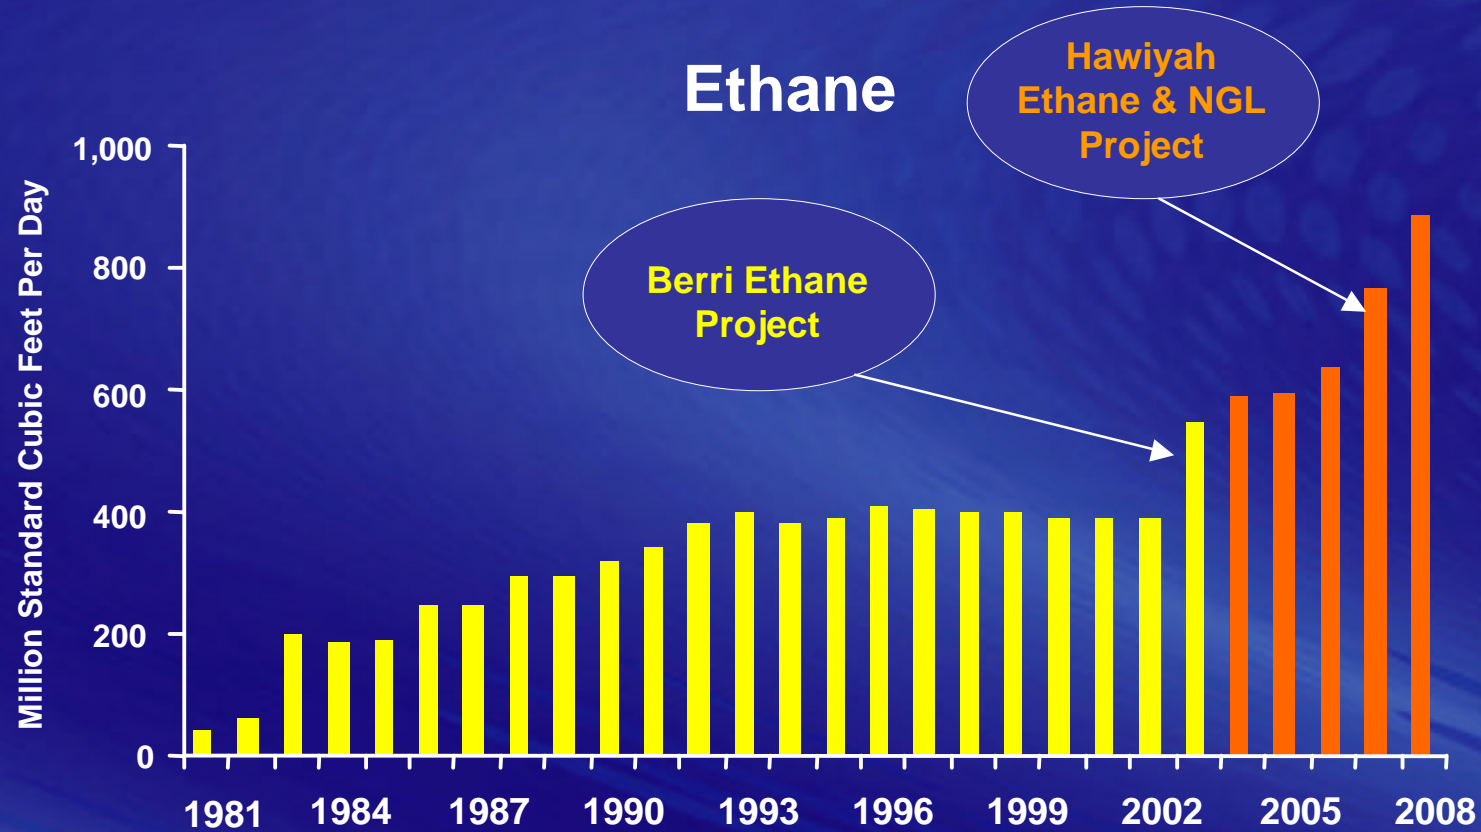

- **Gas-based – Near Term**
 - ◆ 235 trillion cubic feet of proven reserves:
 - ✦ Associated with oil = 60%
 - ✦ Non-associated = 40% -- historical growth @ 5 TCF per year
 - ◆ Ethane and NGL increment to feed next wave of projects
- **Upstream gas deals & future Saudi Aramco discoveries – Longer Term**
- **Petrochemicals from refinery integration (e.g. Aromatics & FCC)**

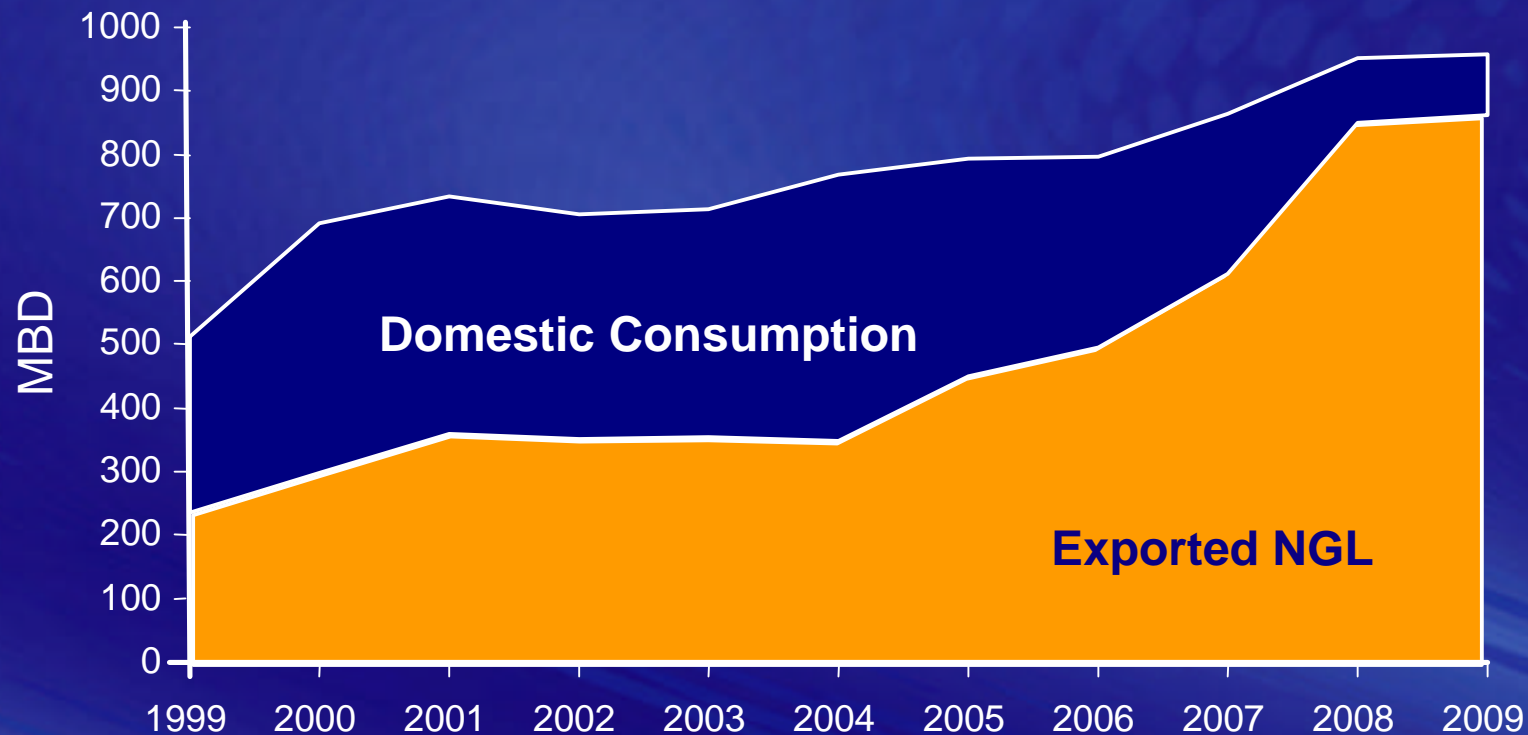

Supply of sales gas is steadily increasing...

New Increments of Ethane Supply

NGL production is steadily increasing, more volumes are being directed to the domestic market

Summary of Near Term Gas-Based Developments

- **\$3 billion + Saudi Aramco investment for new ethane & NGL capacity**
- **400 MMSFD ethane 250 MBD NGL and 500 MMSFD methane allocated to new mega petrochemical projects.**
 - ◆ Ethylene production will more than double
 - ✦ 6 million tons end of 2003 to +13 million tons by 2008
 - ◆ Other large NGL and methane projects allocated feed
- **Rabigh Project – integrates ethane cracking with high olefins cat cracking - \$4.3 billion investment by Sumitomo Chemical/Saudi Aramco**
- **New supplies will drive \$20 billion in downstream investment creating more than 12,000 new direct jobs and adding \$billions to Kingdom's GDP**

Next Wave of Projects

| Cracker Projects | | | |
|---|-------------------------------------|---|--------------------------|
| Company | Feedstock Allocated | Products | Expected Start-up |
| Jubail United Petrochemical Co. (100 % Sabic) | Ethane-Propane | Polyolefins-EG | 4Q 2004 |
| Jubail Chevron Phillips –Phase 2 (CPC & Saudi Ind. Invest. Group) | Natural Gasoline | Styrene | 1Q 2007 |
| NPIC-Al-Zamil @ Jubail | Ethane-Propane | Polyolefins / VAM | 1Q 2007 |
| SABIC @ Yanbu | Ethane-Propane | Polyolefins, EG | 2Q 2007 |
| SHARQ (50%Sabic 50% Mitsubishi & others) @ Jubail | Ethane-Propane | PE & EG | 1Q 2008 |
| Jubail Chevron Phillips - Phase-3 @ Jubail | Ethane-Propane- Natural Gasoline | Polyolefins, Alpha Olefins, Styrene, K-resins | 4Q 2008 |
| Project Management & Development Co. @ Jubail | Ethane-Butanes | Polyolefins, BPA, Amines | 2Q 2008 |
| Rabigh Project @ Rabigh Refinery Sumitomo Chemical/Saudi Aramco | Ethane-V. Gas Oil | Gasoline, Polyolefins, Propylene Oxide, Ethylene Glycol, Alpha Olefins, Acrylics | 3Q 2008 |

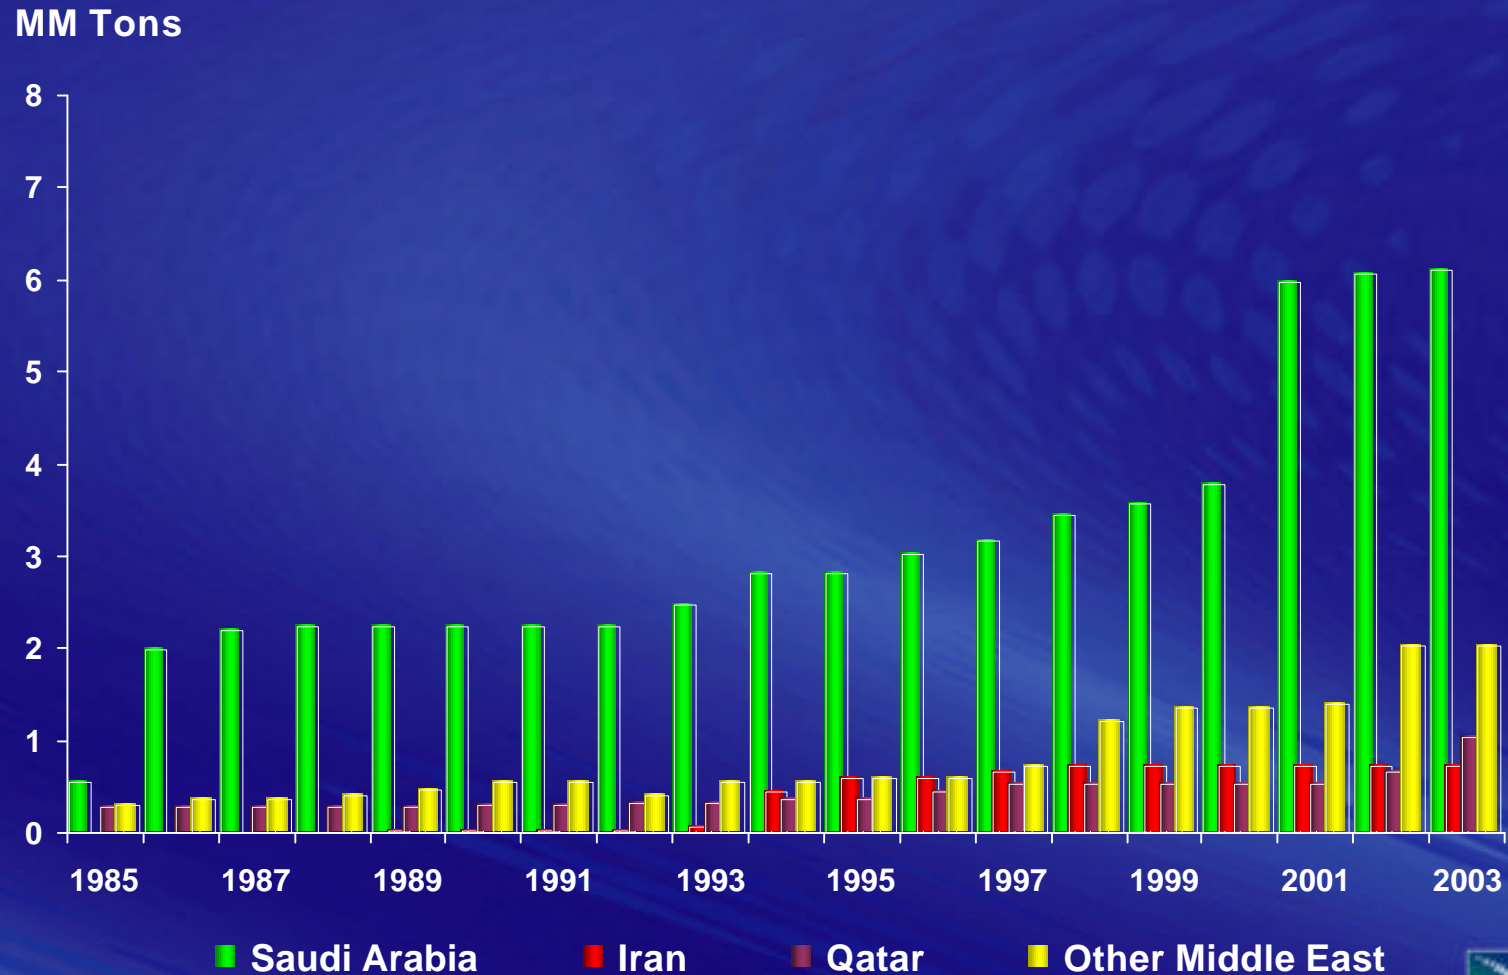

Next Wave of Projects (Contd)

| Project | Expected Start-up |
|---|-------------------|
| <i>Propane Dehydrogenation to Propylene & Derivatives</i> | |
| National Petrochemicals Industrialization Co (NPIC) @ Jubail | Under start up |
| National Polypropylene Company (NPPC) @ Jubail | 1Q 2006 |
| Al-Zamil Group @ Jubail | 3Q 2007 |
| Alujain Company @ Yanbu | 1Q 2008 |
| <i>Butane-Based Projects</i> | |
| Gulf Advanced Chemicals Industries (Sipchem Affiliate) (Butanediol / MAN) @ Jubail | 1Q 2006 |
| Alujain Company (Iso-octane Project) @Jubail | 1Q 2008 |
| <i>Methane-Based Projects</i> | |
| SAFCO-4 (SABIC Affiliate) (ammonia / urea) @ Jubail | 4Q 2005 |
| Saudi International Petrochemicals Company (Sipchem) (methanol / acetic acid) @ Jubail | 1Q 2006 |
| National Petrochemicals Industrialization Company (NPIC) (methanol / acetic acid) @ Jubail | 1Q 2007 |

Growth in Middle East Ethylene Capacity

Long Term Vision

- Leverage advantaged cost position by adding value through the chain
- Diversify the industry
- Capitalize upon industry cluster synergies

Kingdom needs added jobs and investments from the industry

Thank You
